

## ACROBATIC AIRBAG

**Product description:** An AcrobaticAirbag is a product that absorbs jumps during any gymnastic training. The greatest advantage is its portability. Because it can be prepared for usage and packed after within minutes, training can be accomplished virtually and anywhere. Use it in your acrobatic zone, or in the gym. In addition, you can combine the airbag with many other devices to your convenience.

Replace the standard foam landing with a soft and hygienic alternative- AcrobaticAirbag!
